Education

I. K. Gujral Punjab Technical University Mohali campus-1
B.Tech in Coumpute Science Engineering

July 2024 - Present
CGPA : 8.29

Experience

GirlScript Summer of Code 2026 — Open Source Contributor

May 2026 - Present

- Ranked among the Top 100 contributors in GirlScript Summer of Code 2026, successfully merging 80+ pull requests across multiple production-grade open-source repositories.
- Developed and shipped user-facing features including bookmarking systems, notification preferences, autosave workflows, advanced search/filtering, and role-based access controls, improving usability and user engagement.
- Strengthened application reliability by implementing backend validation, API security enhancements, and automated test coverage while collaborating through code reviews, issue tracking, and CI-driven development workflows.

Cognifyz Technologies — Full Stack Development Intern

May 2026 - June 2026

- Developed scalable full-stack applications using Node.js, Express.js, MongoDB, and EJS, covering authentication, database integration, and responsive UI development.
- Implemented secure and optimized backend architectures using JWT, bcrypt, rate limiting, caching, and request logging following industry best practices.

Project

AlgoMentor — AI-Powered DSA Roadmap & Analytics Platform

[Github](#) / [Live Demo](#)

React, Node.js, Express, MongoDB, JWT, Tailwind CSS

- Built an AI-powered interview preparation platform that converts coding-practice history into personalized roadmaps, weak-topic detection, adaptive revision plans, and interview-readiness analytics.
- Designed a recommendation engine using Directed Graphs, BFS/DFS traversal, and Binary Max Heap scheduling to generate dependency-aware learning paths and company-specific preparation strategies.

Planzo — Event Services Marketplace

[Github](#) / [Live Demo](#)

MERN Stack, JWT, MongoDB, Cloudinary

- Developed a full-stack marketplace connecting customers and vendors through secure booking workflows, role-based authentication, and real-time booking management.
- Engineered scalable REST APIs and MongoDB schemas supporting reviews, ratings, favorites, vendor portfolios, and complete booking lifecycle tracking.

CardioScan — Heart Disease Prediction System

[Github](#) / [Live Demo](#)

Python, Scikit-Learn, Machine Learning

- Built a machine learning-based clinical risk assessment system for heart disease prediction using patient health and diagnostic parameters.
- Applied feature engineering, model evaluation, and hyperparameter optimization to improve predictive performance and enable real-time risk analysis.

Technical Skills

- Languages:** C++, C, JavaScript, Python, HTML, CSS
- Frontend:** React.js, Tailwind CSS, Bootstrap, Vite
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- Databases:** MongoDB, MySQL, Mongoose
- Tools:** Git, GitHub, Postman, Render, Vercel, VS Code, Jupyter Notebook
- Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- Machine Learning:** Scikit-Learn, Pandas, NumPy, Data Preprocessing, Feature Engineering

Achievements

- Solved 500+ Data Structures and Algorithms problems across LeetCode and other coding platforms.
- Ranked among the Top 100 contributors in GirlScript Summer of Code 2026 among thousands of students with 80+ merged pull requests.
- Earned certifications in [Data Structures & Algorithms](#) and [MERN Stack Development](#).
- Built and deployed multiple full-stack applications featuring authentication, analytics, cloud deployment, testing, and scalable backend architectures.
